

Consent to Participate in Research

You are being asked to participate in a research study. Before you agree, you must be provided with a summary of the research study. This summary must contain the key information to help you understand the reasons why you might or might not want to join the study.

Before you agree, the investigator must tell you about:

- (i) the purposes, procedures, and duration of the research;
- (ii) any procedures which are experimental;
- (iii) any reasonably foreseeable risks, discomforts, and benefits of the research;
- (iv) any potentially beneficial alternative procedures or treatments;
- (v) how confidentiality will be maintained; and
- (vi) who to contact with questions, complaints, and injuries.

Where applicable, the investigator must also tell you about:

- (i) any available compensation or medical treatment if injury occurs;
- (ii) the possibility of unforeseeable risks;
- (iii) circumstances when the investigator may halt your participation;
- (iv) any added costs to you;
- (v) what happens if you decide to stop participating;
- (vi) when you will be told about new findings which may affect your willingness to participate;
- (vii) how many people will be in the study; and
- (viii) how you need to authorize use of your medical information for the study.

Your participation in this research is voluntary, and you will not be penalized or lose benefits if you refuse to participate or decide to stop. Signing this document means that the research study, including the above information, has been described to you orally, and that you voluntarily agree to participate. If you agree to participate, you must be given a signed copy of this document and a written summary of the research in English.
